

type: CParent

data members

name

pos

member functions

print

set

virtual member functions

check

apply

myProbj.print()

The diagram illustrates the structure of a C++ class named CParent. It is divided into three main sections: data members, member functions, and virtual member functions. The data members section (green background) contains 'name' and 'pos'. The member functions section (light blue background) contains 'print' and 'set'. The virtual member functions section (dark blue background) contains 'check' and 'apply'. An arrow points from the 'print' function in the member functions section to the 'myProbj.print()' call at the bottom.
